

STRUCTURAL ENGINEERING SITE & PROJECT MANAGEMENT BIM SERVICES

For construction and industrial projects
— smooth collaboration from design to site.

RYMY Consulting supports construction and industrial projects where schedule, interfaces and buildability matter. We combine structural and steel engineering, BIM coordination, and site management and project support into one practical delivery model. We deliver solutions that work in fabrication and on site.

Structural & steel engineering

2D/3D design and Tekla models.
Connection & strength checks, plus shop and erection drawings.

BIM coordination

IFC workflows and model coordination.
Clash detection, issue follow-up, and up-to-date models.

Tekla Structures, Trimble Connect & Solibri environments

Setup, templates and project practices.
Training, user support, and workflow improvement.

Site management & project support

Site roles: site engineer, supervisor, site manager.
Project support: project engineer, production engineer, project manager. Interfaces aligned: design–fabrication–site.

How and where we work

Flexibly remote, hybrid and on-site when needed.
